

## How to Share Your Files from Your Mobile Device

Choose one of these three options:

### Transfer to Portable Drive\*

For Android Users, just connect the USB JumpDrive to your device via the same port you normally connect your charger to. It will show up on your screen as a little box that says Lexar USB Drive "Tap here to transfer media files". Click on "My Files" next and choose a category and locate your file(s). Press and hold for 3 seconds or longer to select your file(s). Tap the 3 dots in the upper right hand corner of your screen to choose copy. Finally, follow directions on screen to transfer your file to the JumpDrive.

\*For iOS Users, you will need to allow your device to download a small app that will allow you to browse, select, and copy your file to the USB Thumb Drive. You must have a Lightning style connector to be able to do this. Older 30 pin connectors are not supported. The process is the same as for Android users.

### E-mail File Directly

E-mail The File Directly off your mobile device by selecting your file(s) and then selecting the Share Symbol (may vary from device to device):

Apple  
iOS 7,  
Mac OS X  
Yosemite

Apple  
iOS 6,  
Mac OS X  
Mavericks

Google  
Android

Next, choose your e-mail program and create a new message.  
Send to:  
CKmobileuploads@gmail.com

### Share Link to File on Cloud Storage via E-Mail

Share The Link to Your File(s) from your favorite Cloud Storage service (DropBox, Google Drive, MS OneDrive, etc.) by selecting the Share Symbol (may vary from device to device):

Apple  
iOS 7,  
Mac OS X  
Yosemite

Apple  
iOS 6,  
Mac OS X  
Mavericks

Google  
Android

Then follow the directions on your screen to create a new e-mail message with the live link and send it to:  
CKmobileuploads@gmail.com

**Note:** Not all devices or services are supported but in most cases, one of these 3 methods will work in getting your file to us for output. There will be a \$10 fee for live assistance with your file transfer if none of these methods work for you. Maximum file size for e-mail transfers is 8mb.
